Hands on Labs

1. **Open Program.cs in Lab7**
   - **Code in Main**
     - **Store the values into Marks1, Marks2 and Marks3 by receiving them from console**
     - **Store them in the finder object by invoking the set methods for each of them**
   - **Code in ResultFinder**
     - **Add set and get methods**
     - **Write the logic for DisplayMarks() method**
     - **Write the logic for GetTotal() method**
     - **Write the logic for GetAverage() method**
     - **Write the logic for GetResult() method**
   - *Use CustomConsole class to read data from the console*
